

myGKK CLOUD | by Dracoon for Mac

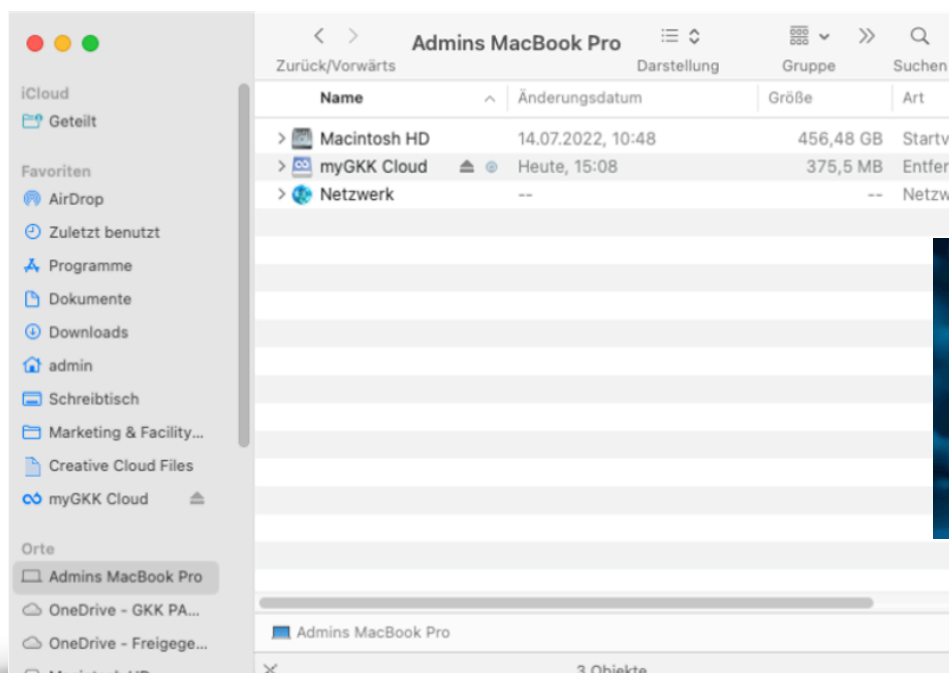

DRACOON for Mac makes it easy to add the myGKK cloud as a volume for the Mac Finder.

- ✓ Convenience of working with DRACOON files in the familiar Mac environment
- ✓ DRACOON files can be opened/saved from any Mac application
- ✓ Saves on disk space
- ✓ Can also access encrypted data rooms

You are just one click away from downloading the installation file!

INSTALLATION IN 3 STEPS

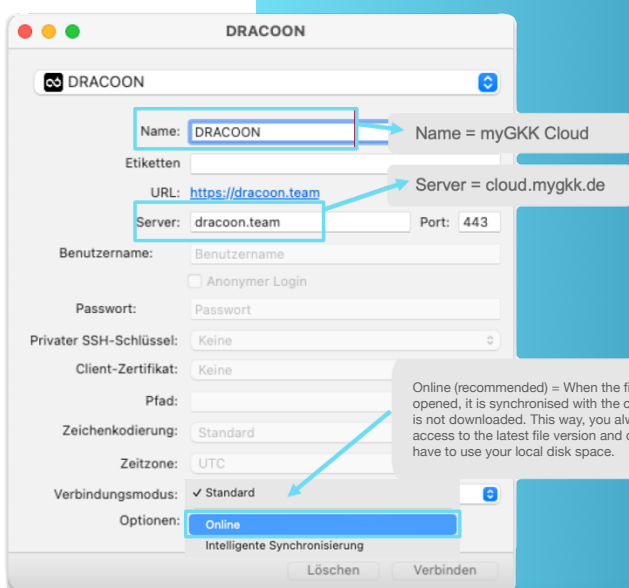

- 1 Double-click the downloaded set-up file (in the Download volume)
- 2 This starts the set-up process. Click Install. Verification (if required)
- 3 The installation process starts.

OPERATION

- 1 In the “Programs” folder, double-click the DRACCOON program to open it. You might be asked to confirm that you want to open the program that has been downloaded from the internet. Confirm with “Open”. After you have opened DRACCOON, the DRACCOON icon will also be displayed in the menu bar ...

2

The dialogue box for the server settings is also displayed.

Please adjust the Name & Server fields and select the connection mode (recommended: online).

- ! Please do not change the setting “443” in the Port field, otherwise the connection cannot be established

FURTHER TO OPERATION

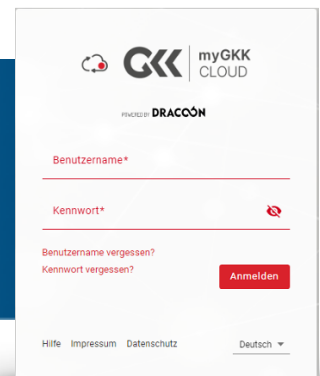

3

Next, click the “Connect” command.

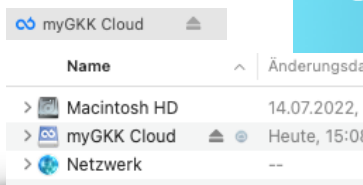

4

The login screen for your myGKK cloud environment will be displayed in your web browser. Enter your user name and password, and click “Login”.

5

After you have successfully connected to your myGKK cloud environment, you can access your myGKK cloud as a volume in the Mac Finder and in all Mac applications.

WELCOME TO THE **myGKK** CLOUD!
